

Asbestos Awareness for Scaffolders Training Course Syllabus

Course Title

Asbestos Training Scaffolders

Description

This course is suitable for scaffolders whose employers hold a valid HSE licence to carry out ancillary works with asbestos removal contractors. This course provides scaffolders with knowledge and understanding of asbestos, the risks from asbestos, and ACM's in buildings and precautions to be taken when carrying out works ancillary to asbestos removal contracts.

Pre-Qualification

No Pre-qualifications required. But pre-course study recommended if new to subject (details will be provided at time of booking).

Duration

1 day.

Content of the Syllabus

This course provides operatives with knowledge and understanding of asbestos and the dangers that are associated with it, also equipping the delegate with the skills and knowledge required to work safely with ACMs.

Topics covered include:

- Types uses and risk factors of asbestos
- Health effects of exposure to asbestos
- Typical locations and risks of ACM's in buildings
- Types and uses of PPE
- Types and uses of RPE
- Decontamination and transit procedures
- Emergency procedures for dealing with accidental exposure.
