

Asbestos Training for Non-Licensable Work Training Course Syllabus

Course Title

Asbestos Training for Non-Licensable Work

Description

This module provides the trainee with the practical knowledge and skills to be able to understand the issues when dealing with potential Asbestos Hazards with specific regard to non-licensable works (ie working with ACMs that do not require fully controlled removal or notification to the HSE).

Pre-Qualification

No Pre-qualifications required. But pre-course study recommended if new to subject (details will be provided at time of booking).

Duration

1 day.

Content of the Syllabus

This course provides operatives with knowledge and understanding of asbestos and the dangers that are associated with it, also equipping the delegate with the skills and knowledge required to work safely with non-licensable ACMs (ie Artex or Asbestos Cement)

Topics covered include:

- A brief history of the uses of asbestos
- Asbestos type's properties and risks
- The effects of asbestos on workers health
- The type's uses and risks of ACM's in buildings and plant
- Procedures to deal with accidental exposure to asbestos
- How to avoid the risks of ACM's in buildings
- Selection and use of the correct PPE and RPE
- Maintaining your RPE and the relevance of face fit testing
- Other hazards whilst removing textured coating containing asbestos
- The building of enclosures for work with artex
- The building and maintenance of airlocks
- Use control measures used on site for dust suppression
- Cleaning down the work area
- Cleanliness of plant and equipment
- Correct waste handling on site
